Course Introduction

Property and Facility Management is increasingly gaining importance in the property and building industry, buoyed by the growing numbers of high-rise, cluster and strata developments both in the private and public sectors in Singapore and globally. This transcends across all sectors of real estate, be it residential, commercial, industrial, warehousing as well as integrated mixed developments. With the rising trend towards more high-tech facility management, green technologies and renewable energy in the built environment, there is a critical need for professionals who are proficient technically to manage, maintain and operate these buildings and developments for optimal performance.

Period of Registration: 2nd May 2023 to 1st May 2025

- Module 10 – Management of Organisations and Human Resources
- Module 11 – Accounting and Finance
- Module 12 – Management of Maintenance Contracts
- Module 13 – Property Management
- Module 14 – Strata Title and Town Council Management
- Module 15 – Conflict Management

Course Objectives

This 24-month part-time diploma programme aims to equip the students with a comprehensive understanding, knowledge and skills of the different aspects of property and facilities management – ranging from construction processes, building, mechanical and electrical services, landscape management, management of property facilities, energy management, contract management, legal matters to management of people and organisations, and various aspects of modern property management.

At the end of the course, the candidates would gain a comprehensive knowledge in property and facility management and be equipped with the necessary skills and expertise in this field. Upon graduation, the candidates would have the added competitive edge and be competent technically and operation-ready in handling various aspects of property and facility management.

LEARNING OUTCOME

The syllabus structure provides a structured desired learning outcome expected for candidates for each module of the study, and the skill sets required through an appropriate examination and testing conducted for each core area of the syllabus:

| | |
|--------------------------------------|--|
| Level 1 Knowledge Acquisition | Focuses on laying the foundation for essential knowledge on property and facility management. Candidates acquire the basic terminologies used and the laws/ rules/ regulations/ practice guidelines and procedures imposed by the relevant authorities and used in the industry. |
| Level 2 Understanding | Candidates acquire understanding and appreciation of the various requirements in property and facility management. |
| Level 3 Application | Candidates are able to make use of the knowledge and skill sets acquired and apply in practical real-life situations. |

DELIVERY & DURATION

This Professional Diploma course is designed to cover 15 Modules, comprising lectures, tutorials, assignments, field trips, case studies and other modes of delivery.

| | |
|-----------------|--|
| Duration | 225 days of 3 hours each session (total 675 hours) |
| Time | 6.30pm to 9.30pm (Mondays, Wednesdays & Fridays) or 9.30am to 12.30pm (Selected Saturdays where applicable) |

Candidates will need to fulfill at least 75% attendance before being able to qualify to sit for the examination. Make up classes will be subject to availability.

ASSESSMENT

The examination will consist of one written paper with a duration of 2 or 3 hours. A typical examination paper will comprise the following:

| | | |
|----|---|-------|
| 1. | Multiple choice questions (MCQ) | (60%) |
| 2. | Case Studies (where applicable) and Written Essays | (30%) |
| 3. | Projects and Practical Assignments (where applicable) | (10%) |

ENTRY REQUIREMENT

Registrants are expected to have obtained at least C6 at G.C.E 'O' Level in any three subjects or equivalent and preferably at least 2 years working experience in relevant, real estate/property management companies.
